

Dear Visitor!

Welcome to the website of the Algyői „Fehér Ignác” Primary School. We are grateful to you for having a look at our everyday life in the virtual space.

We strive to continuously update the information here in order to provide the parents and the visitors of our website with relevant information on the lessons, the activities outside the classrooms, the upcoming events, our project weeks and our eco-programmes.

Our philosophy is that every child has a talent for something and our task is to find out what it can be. Our teachers’ professional skills and their experience as well as the calm and homely atmosphere help us achieve this goal.

We try to create a child-centered school where every child, parent and teacher feels good.

Our goal is to provide our learners with a high quality education, a versatile personal development, the general human and European core values and moral norms which enable our students to cope with the challenges of our age. A great emphasis is placed on teaching our children to become self-educators and to develop an open mindset for the changes in the world. We also promote the desire for life-long learning that is crucial to be able to develop creativity and knowledge that can serve as a firm ground for their future development.

Our pedagogical programme is based on the development of the key competencies. We provide our learners with education in classes specialized in P.E., classes with a higher number of English lessons and classes with a general number of English lessons. As the Base Institute of the Office of Education we share our good practices with the other schools of the region.

We teach our students road safety with the help of the „KEVE Program”. We also give them information on the crime prevention work within the „Kék Tér” programme. We have applied for the „Boldog Iskola” („Happy School”) title that we have owned since 2021.

It is essential for us to provide every child with equal chances and we pay a great attention to children with special educational needs.

As an „Eternal Eco School” we respect the values of wildlife by giving our learners an environmentally conscious education. We strive to cause as little harm as possible to the ecosystem in the operation of our school and in the education of healthy lifestyle as well as when we organise camps, hiking tours, various programmes and project weeks. Our students participate in the sustainability project weeks every year.

Please visit our school! We look forward to seeing you!

Ildikó Pál Dr Gondáné

Head of School
